Hair and Saliva Wellness Analysis Kit

# Why Results with Riannan Health Scans

Our comprehensive bioenergetic scanning allows you to understand your body and mind on a deeper level. Through innovative testing techniques we can identify stresses in the body, and work towards achieving optimum health and overall wellness. This non-invasive scan is all done through saliva and hair or nail clippings that you mail in for analysis.

## Each Bio Energy Scan Tests For:

- Internal stress on organs and 14 systems
- Hormonal imbalances
- Nutritional imbalances (vitamins, minerals, amino acids, enzymes, essential fatty acids)
- Food and environmental sensitivities
- Toxins (bacteria, molds, chemicals, viruses, metals, parasites)

## No More Guesswork!

Upon completion of the scan, you will receive a detailed report of findings. Knowledge is key, but action is equally as important, which is why we provide a customized regimen within each report. This detailed regimen is tested against your hair and saliva for precise efficacy and may include herbs, homeopathic remedies, essential oils, and nutritional supplements.
